The Newton Montessori School

~ **8:30 Coffee**

~ **9:00 - 12:00 Workshop**

Montessori Toddler Overview

In the Montessori community, teachers prefer to view toddlers as 'terrific-twos'. However, as we all know in the general public these children are regarded as "terrible twos". What makes these children behave in such a way to deserve this characterization? Wouldn't it be nice to be able to dispel this negative view of the 18 month to 3 year old? Our speaker will explore the development of the toddler cognitively, emotionally and physically. Perhaps with an understanding of what makes them tick a new interpretation of this child will emerge.

Presented By: Judy Joynt

Judy has been a presenter and field consultant for the Center for Montessori Teacher Education in New York since 1997. She travels the country visiting the students training for Infant and Toddler certification. Prior to this, she was a toddler teacher in Mamaroneck, NY for 13 years. Judy took Infant and Toddler training in '91 and believes the Montessori approach for children fosters trust; first in the child's small egocentric world, and then in his bigger world, which is beneficial in all aspects of the child's present and future life.

FEE FOR WORKSHOP IS 20.00 per person.
